

## Accessible Mobile Voting

At Voatz, we are committed to full accessibility in all our products. Our Mobile Elections Platform provides robust support for voters with visual, cognitive, and mobility issues. We comply with or exceed all industry and regulatory accessibility standards and guidelines. In addition to rigorous internal testing and remediation, we continuously seek and incorporate feedback from external third-party accessibility test labs and from accessibility experts and advocates for the disabled community.

### Voatz follows these industry and regulatory accessibility standards:

- Worldwide Web Consortium WCAG 2.1 AA / Section 508
- EAC Voluntary Voting System Guidelines for electronic voting systems
- National Institute of Standards and Technology guidelines for remote accessible ballots
- Apple iOS and Android best practices

### The Voatz Mobile App supports these native smartphone capabilities:

- VoiceOver/TalkBack narration
- Predictable navigation
- Configurable font size
- Speech-to-Text (for write-ins)
- Flexible session timeout
- Support for Bluetooth assistive devices
